### Habitat tree distribution by species (N in %)

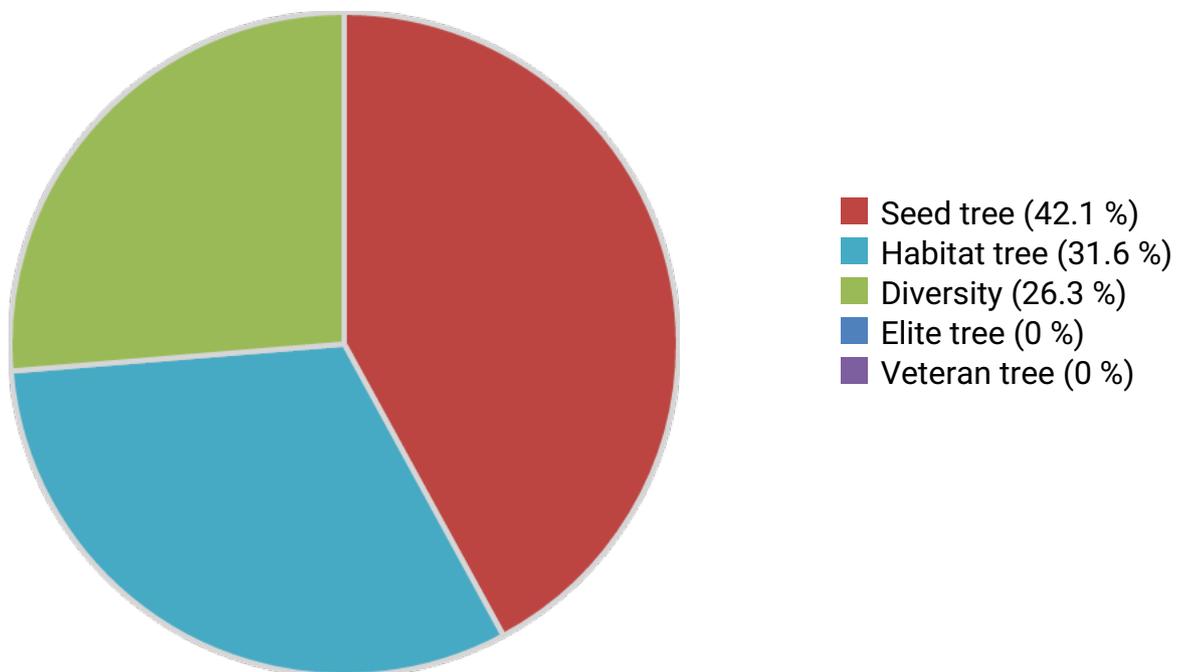

### Spatial distribution of habitat trees

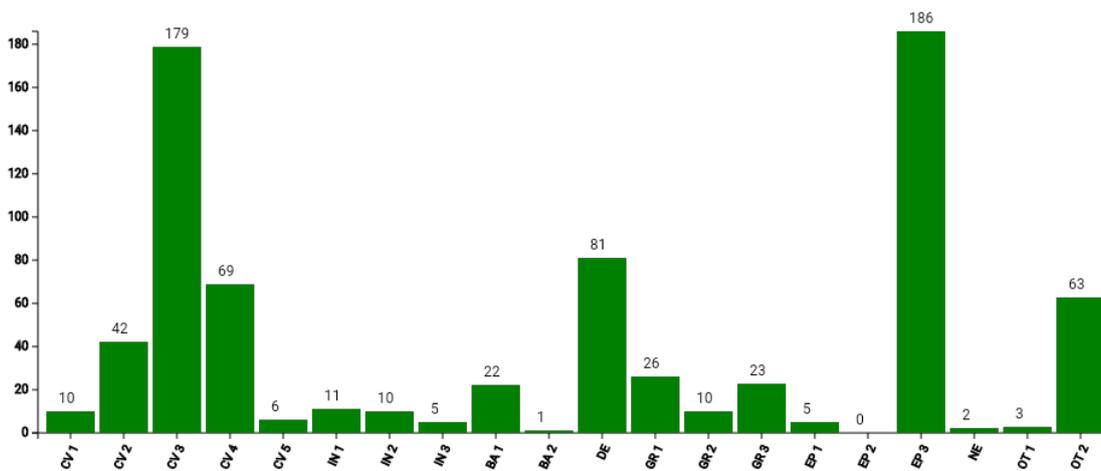

### Reasons for removal

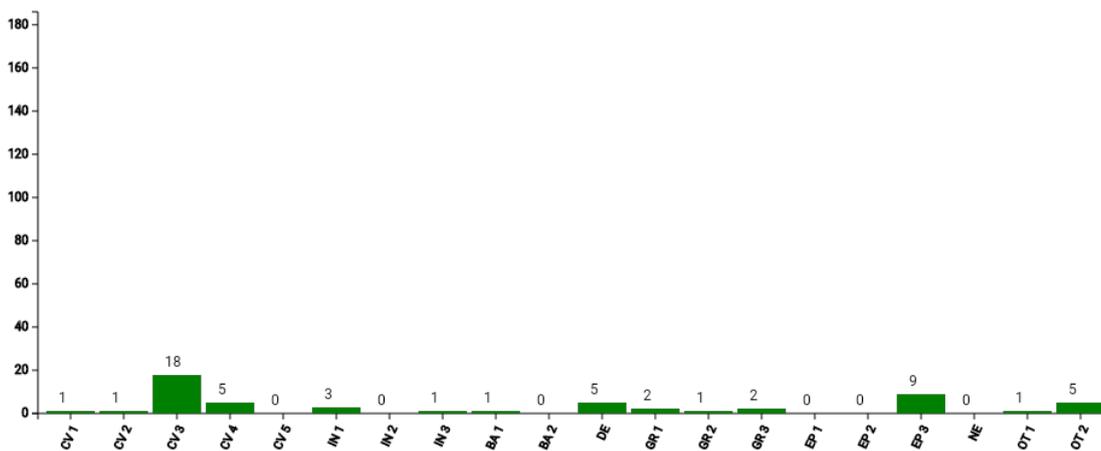

### Reasons for retention

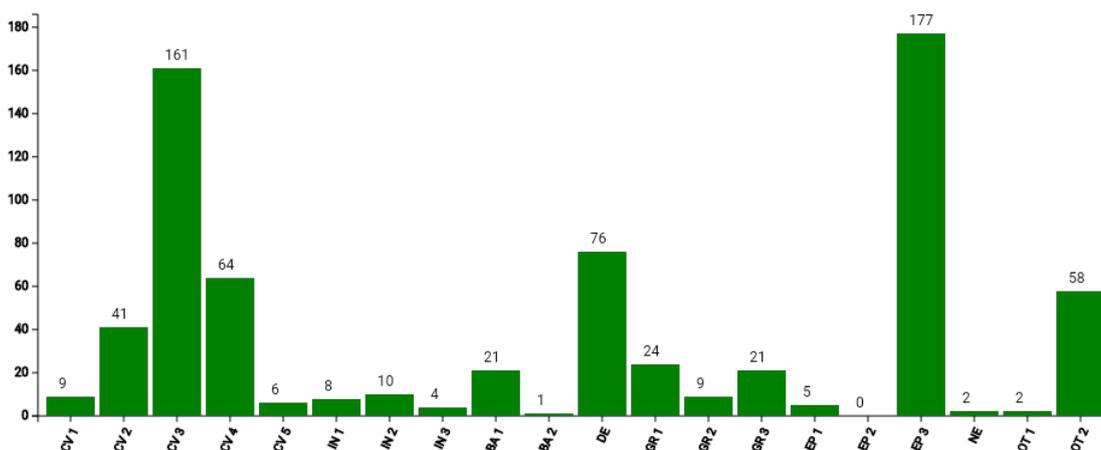

### Distribution of tree microhabitats by code (N total)

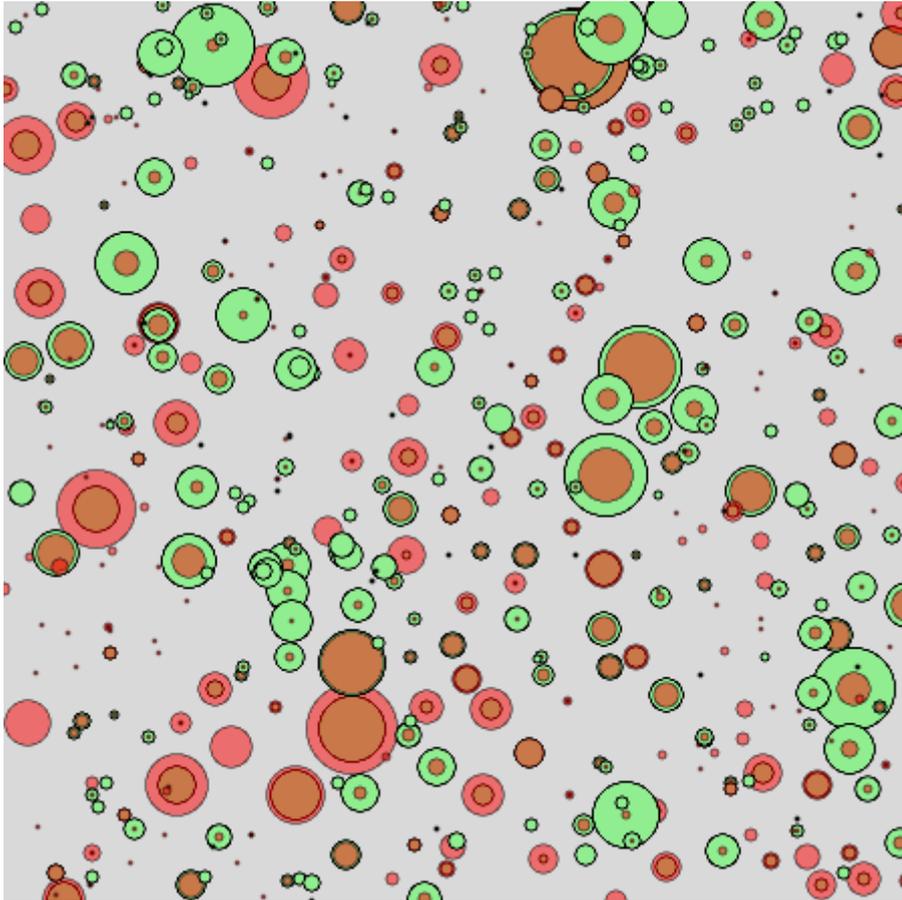

### Removed tree microhabitats by code (N removed)

### Remaining tree microhabitats by code (N after harvest)

For more details on codes consult the field guide "Catalogue of tree microhabitats" or the tree microhabitat app.

**Conflict trees (stand data)****Description:**

Overlay of economic and habitat value: red circles (economic value), green circles (habitat value); circle size according to numerical values (e.g. large circles mean high values); trees with very low values are not visible. Trees where both values overlap considerably represent so called "conflict trees".
